If you are having an emergency, look for a blue light. The blue light identifies the location of an emergency telephone. Press the button to be connected to a 911 dispatch operator. Every call is responded to by a police officer.
Cougar trails

The Cougar Trails project provides six miles of walking, jogging and biking paths. Designated jogging paths and interpretive trails provide all-weather walking surface wide enough for two people. The other unimproved trails are typical of what you would find in many forested areas of the region.

History

The Mill Creek Riparian Interpretive Trail, part of the WSU Vancouver Cougar Trails System, is designed to expand our knowledge and understanding of the ecological functions of plant and soil systems that border a waterway. Maintaining good water quality in Mill Creek is necessary to preserve a healthy environment for the fish, wildlife and people who live in and along the creek.

POULAR ROUTES

GREEN LOOP | 1.3 miles
Loops around the amphitheater and back through the center of campus. Paved throughout.

ORANGE LOOP | 1.3 miles
Loops around the east end of campus, along Mill Creek and by the barn. Mix of cedar chips and trail, with paved sections and frequent changes in elevation.

BLUE LOOP | 2.5 miles
Loops around the amphitheater, main entrance, north and south ends and back through the center of campus. Paved throughout with changes in elevation.

RED LOOP | 4.6 miles
Loops around the entire campus, from south to east entrances. Mix of cedar chips, trail and paved sections with changes in elevation.
